

What's not included?

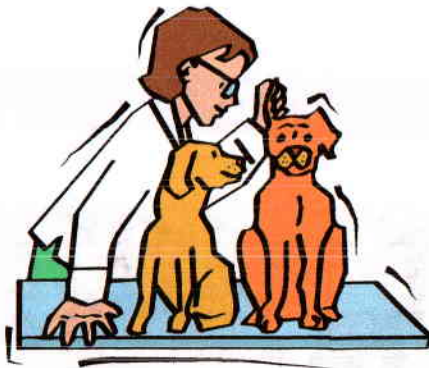

Additional testing or treatment of problems diagnosed at regularly scheduled appointments.

Additional examinations due to sudden illness or injury between annual wellness visits.

Any surgical procedure recommended.

All other vaccinations not included in packages will be at additional cost.

All packages are nonrefundable and nontransferable.

Gentle Vet Animal Hospital was

established under the name of Brown County Veterinary Hospital in 1970. Our primary goal is to help pets and their families by providing the best medical care possible. We strive to make each patient as comfortable as possible, and treat every pet as if it were our own.

Our health care team is committed to maintaining a clean, modern facility, and to use the most current diagnostics and treatments.

We strongly feel that preventative care, including annual exams, vaccinations, parasite prevention, diet and dental care is the mainstay of good health for your pet.

Why annual fecal tests and preventative dewormings

It is thought that 30-50 percent of dogs and cats carry gastrointestinal (GI) parasites and that 1-3 million people in the U.S. have infections from the same parasites carried by pets. Children, the elderly and immunocompromised people are at high risk.
